Empty Roll Of Toilet Paper With Chewed Gum Stuck To It, 2025
Toilet paper roll, gum, 3D printed matte PLA, Plexiglas case

I don't know how the gum got stuck to the roll. Ok that's a lie. I was chewing gum on the toilet and I saw the roll and I put it on there. I am sorry.

I am trying to get better at only using an amount of ketchup that is proportional to the amount of nuggets on the plate so that there is not a lot wasted. On this attempt I failed.

Empty Water Bottle That I Chewed The Cap Of And Spit It Back Into The Bottle, 2025

Plastic bottle, plastic cap, spit, 3D printed matte PLA, Plexiglas case

I don't know why but I compulsively chew the caps of water bottles and spit them back into the bottle every time. It is a huge choking hazard and I believe this is how I will die.

Dead Battery From TV Remote, 2025

I think there were 2 of these but I don't know where the other one is.
